

Product data sheet

Smart dimmer switch modular

Reference number

US-S600

Push dimmer insert 20 - 600 VA

Intended use

- Dimmable LED
- Switching and dimming incandescent lamps, HV halogen lamps and TRONIC transformers with halogen lamps
- Suitable for mixed operation up to the specified output
- Installation in appliance box according to US Standard panel

Product characteristics

- Dimming method: Smart phase control
- Electronic short-circuit protection
- Overload protection
- Over current protection
- Over temperature protection

Technical data

Rated voltage:	AC 110-120V ~, 60 Hz
Connected load:	20VA - 600VA (1 - 20 LEDs, 300W max.)
Dimming method:	Smart phase control
Type of loads:	Dimmable LED 110 - 120V AC Incandescent lamps High voltage halogen lamps Dimmable electrical transformer and iron transformer Mixed loads of the specified types
Connection:	screw terminals
Approvals:	UL
